

### Spectacle Eyewear EYS1 VS196C

<b>Description</b>	Wrap-Around One Piece Spectacle
<b>Lens</b>	Clear lens
<b>Physical Properties</b>	One piece optical front reduces imbalances of two-lens eyewear and eliminates the chance of lens popping out on impact. Light, evenly distributed weight provides greater comfort and wearer acceptance. 100% Polycarbonate material increases worker protection by resisting high impact and offering UV protection. Vented sideshield-type temples allows air to flow and reduces heat build-up and lens fogging. Scratch resistant, coated front extends the life of the eyewear.
<b>Uses</b>	This spectacle can be used in areas where the risk of injury from high impact is present when grinding, drilling, or woodworking, for example. Can be used as an “over spec” to offer full eye protection when wearing prescription spectacles.
<b>Standards</b>	Conforms to ANSI Z87.1-2010
<b>Precautions</b>	Not to be used for any form of gas cutting or gas welding. Not to be used when arc welding. No protection is offered from infrared radiation. Not suitable as protection from chemical splash.
