

### Balaclavas

### HFC2 FRHOODL

<b>Description</b>	Full Head Protection Hood/Balaclava to Protect Against Heat
<b>Physical Properties</b>	The knit fabrics are made with a combination of Kermel® and Lenzing® fibres which are inherently flame resistant. Kermel® fibres are naturally non-flammable and pleasant to the touch. They have a high resistance to abrasion and chemicals. Lenzing® FR Viscose has a flame retardant pigment built into the fibre during the spinning stage. The combination of these two fibres produces a garment offering excellent comfort properties with inherent FR protection capabilities.
<b>Uses</b>	Used for protection in heat applications
<b>Sizes</b>	One size
<b>Standard</b>	NFPA 1971-2007
